

Yash Sharma

Front-end Web Developer

As a front-end developer and UI/UX designer, I specialize in creating visually appealing and user-friendly websites and applications. My skills include HTML, CSS, JavaScript, and frameworks such as ReactJs and NextJs. I am also well-versed in design principles and have experience using tools such as Adobe Creative Suite, Sketch, and Figma.

Projects

03/2023 - 04/2024

Personal Portfolio Website

I As a front-end web developer, I created my own personal portfolio website to showcase my skills and experience. The website was built using ReactJS, NextJS, Tailwind CSS, and Framer Motion, which enabled me to create a website that is both visually appealing and highly functional.

The website features a clean and modern design that highlights my projects, skills, and experience. It includes sections such as About, Projects, Skills, and Contact, which provide users with a clear understanding of who I am, what I do, and how to get in touch with me.

Website Can be Accessed through this link - <https://sharmayash08.github.io/Portfolio/>

10/2022 - 12/2022

Property Website

I designed and developed a property website using HTML and CSS. This website provides users with the ability to browse and search for properties, view property details, and communicate with property owners or agents. The website features a responsive design that ensures optimal user experience across all devices, and includes a contact form that allows users to easily get in touch with property owners or agents.

My skills in user interface and experience design were utilized to create an intuitive and user-friendly interface that makes it easy for users to navigate the website and find the property they are looking for. The project is available on GitHub, which showcases my proficiency in version control and collaboration skills.

Certificates

11/2022 - 01/2023

Udemy

Complete Web Design: from Figma to Webflow

In this Complete Web Design course, I gained proficiency in design tools such as Figma and Webflow. I learned how to create responsive and visually appealing designs, develop websites using HTML, CSS, and JavaScript, and optimize for performance and user experience. This certificate demonstrates my knowledge and skills in web design and development.

06/2022-09/2022

Udemy

Web Development

In this Web Development certificate, I gained proficiency in front-end development technologies such as HTML, CSS, and JavaScript. I also learned how to build dynamic and responsive user interfaces using ReactJS. This certificate demonstrates my knowledge and skills in front-end web development
